

**DIRECT
MAT**

Presentation Dec 2009

Work Package 2 - Unbound Materials

Mr Knud A. Pihl from
Danish Road Institute

WP2 Objectives

Objectives for DIRECT-MAT:

To share national knowledge and practice regarding dismantling and recycling of road and road-related materials back into roads

Objectives for WP2 - Unbound materials:

Knowledge transfer concerning end of life strategies

Provide user with practise of nearly 100 % recycling

Draft new performance-based specifications

WP2 Significant results 2009

Deliverable 3: "Syntheses of national documents on existing knowledge regarding unbound materials" are delivered in a draft version

- Reuse of recycled materials is promoted for economical and environmental awareness (preservation of resources, high cost landfilling, ...)
- The quantity of available materials are still increasing and the recycling techniques are still improving (for example a better separation)

A poster for Work Package 2 work is prepared

A draft presentation is available

Work plan 2010

Deliverable D3 finalized incl. international literature

Field and laboratory data collection

- The work has been started: focus is on electing working sites in every participant country
- A task group is formed and a preliminary work plan is decided

Best practice guide

A task group is formed
